

Conclusions

NASE course 2022

During the final session of the Lahijan course, participants had the opportunity to give their opinions about the course as conclusion of it. We list here, several of opinions following:

- The workshop was excellent and I will definitely participate in the next courses.
- In this course, I learned many of the basic concepts of astronomy in a principled way and by making tools.
- The teachers taught very patiently and carefully. Thank you very much
- This workshop helped me to better understand my surroundings, such as the place of sunrise and sunset. Astronomical monuments and even getting in the car on sunny days.
- The management of the workshops was excellent and the most attractive part of the workshops was tool making.
- The workshop atmosphere was very friendly and not having an exam at the end of the course was the best advantage of this program.
- The content of the workshops was very coherent and relevant.
- A combination of practical work and theoretical content made the workshops attractive.
- It was my first experience participating in this course, but in two days I learned a lot of information.
- I hope the workshops will be held in person soon
