What especially criticize?

- Nothing
- We stay for too long cutting papers
- Maybe we should spend more time doing the course to go deep in some processes and information
- It would have been better to have another class space in order to be distributed around the teacher and could see better the examples and hear the explanations (somewhere where we could do a semicircle would be nice)
- Si he d'indicar un punt feble és que la curta durada del curs no permet que alguns coneixements es puguin explicar amb la profunditat i el detall necessari perquè quedin del tot raonats.

What would value more?

- All the material in the website for the future
- The material and ideas given in the course
- I enjoyed a lot all the exemplified explanations, they are useful not only for adolescents but also for us, adults, as far as we didn't know any of this before
- Es valora que se'ns proporcionin vàries activitats per ensenyar astronomia ja que no s'inclou en el màster de professorat.
