

Conclusions

Ivory Coast 2023

For the second time, the Association Ivoirienne d'Astronomie (AIA) took part in an Astronomy training session organised by NASE (Network for Astronomy School Education), the first of which took place on July 2022. This training session, which took place by videoconference. It focused on subjects like Evolution of the Stars, Cosmology, Solar spectrum and sunspots, Stellar lives, Astronomy beyond the visible, Expansion of the Universe.

Combining both theory and practice, NASE's trainers were able to enrich AIA members' knowledge of astronomy and astrophysics through training workshops followed by question-and-answer sessions. DIABY Kassamba Abdel Aziz, President of the AIA, YAO Marc Harris, Vice-President of the AIA, N'GUESSAN Kouassi, Secretary-General of the AIA, AKA Pancrace, and some other members like AIA, ACKAH Jean-Baptiste, AHOUA Ange Stéphane, TUO Zié, AMAN Kpolé Simplicie, LASME Mickaël Jaurès, MAHIE Ange Stéphane, KPLE Paul, DOSSO Sinali and TAO Abdoul Gany will, in turn, have to pass on the knowledge learned and acquired during these three days of training to children, young people and adults throughout Côte d'Ivoire in order to boost progress in space science and technology. This course was so interesting as said by AIA members.
