Astrophysics course

Words from some of participants during the final session

- 1) I liked very much the course Life of stars. For me it was very important that the experiments can be done with simple materials.
- 2) The entire course was difficult for me but I will repeat some notions to understand better. I am very satisfied with the course.
- 3) We would also like to follow the astrobiology workshops.
- 4) I valorise that instructors illustrates with models to make it easier to understand.
- 5) I appreciated every activities in the course, especially workshops.
