

Conclusions NASE in Vietnam ASTRONOMY

In the closing session, there were a general discussion about the course with participants speaking. We present here some of their opinions

- *I am very satisfied with the course.*
- *I come from a school association in Vietnam and represent 15 schools. I am a mathematics teacher and at first, I was scared, thinking that the level was too high, but after the first workshop I found them very interesting and not so difficult to understand. The content of each workshop is very useful for me to teach my students better.*
- *It was a very good course and I think it is important that many more teachers can take it.*
