

# Conclusion

NASE Astronomy Course Bushehr, 2024

During the final session of this course in Bushehr participants are invited to give their comments about the methodology, activities, utility and other aspects of the course that they can introduce.

- It was a very interesting course and very enjoyable to all of participants.
- The activities were very helpful and interesting and instructors make the complicated lessons very easy.
- We hope that this lessons and courses will be in the school's science books for teachers and students.
- This course had some excellent lessons and very good topics which can be useful for participants' fields.
- The instructors were very good and helpful. They helped us to do everything and answered the questions very well.
- These activities and hand-made tools made our understanding easier and we are able to teach our students more efficiently.
