

Conclusions

NASE Astronomy Course 2025

Institute of Physics,

Faculty of Natural Sciences and Mathematics,

Ss Cyril and Methodius University

Skopje, Macedonia

In organisation of the Macedonian Astronomical Society Skopje

The NASE Astronomy Workshop was a valuable experience for all participants. We found the structure of the course well-organized, with carefully selected topics that covered essential aspects of astronomy education. The combination of theoretical content and practical activities provided a balanced approach to learning.

The hands-on activities were particularly engaging and effective in demonstrating key astronomical concepts. They provided useful ideas and techniques that can be applied in educational settings to make astronomy more interactive and accessible.

As a group of participants with a strong background in astronomy, we found some of the theoretical discussions to be redundant. However, we understand that these explanations are necessary for a diverse audience with varying levels of prior knowledge. The workshop's inclusive approach ensures that all attendees, regardless of expertise, can benefit from the material.

The discussions on teaching methodologies were especially insightful, offering fresh perspectives on how to present complex astronomical concepts in a way that is engaging and comprehensible to students. The interactive nature of the workshop also allowed for the exchange of ideas and experiences among participants, which further enriched the learning process.

We appreciate the opportunity to take part in this workshop and we hope to deliver similar training sessions to other astronomy educators. We also found the available resources on the NASE website to be a great asset for further study and application.

Thank you for organizing this workshop and for your dedication to astronomy education. We look forward to future collaborations.

Best regards,
Jana Bogdanoska
President of the Macedonian Astronomical Society
