

Conclusions

NASE Astronomy course Lahijan, Iran, 2025

During the last session of the course, participants give their opinions about the course. These are an excellent summary as conclusions of the course.

- I found the NASE course fascinating because it combined theory with hands-on activities. Thank you!
- Building simple astronomical tools helped me understand complex concepts better.
- I never knew I could make my own astronomical tools—it was an amazing experience! The instructor explained everything clearly, making astronomy more accessible.
- This course made me appreciate the night sky in a completely new way. I loved how practical and engaging the lessons were.
- Observing the stars with tools like ruler and sky map we made ourselves was incredibly rewarding. Thanks for this Course!
- I used to think astronomy was too difficult, but this course proved me wrong.
- I learned about celestial objects and it was fantastic. I will teach them to my students.
- I wish the course was longer because I enjoyed every part of it specially making tools!
- Now I feel confident enough to explain basic astronomy to my student and of course I should study more. Please organize more courses. Thank you!
- This was the perfect course for teachers who are beginners and interested in stargazing. This course was really useful for us!
- I liked how we used everyday materials to create scientific instruments and hands-on approach made learning much more enjoyable.
- I feel inspired to continue exploring astronomy. Thanks NASE team!
