Interesting	Unteresting	Nothing Interesting
46%	36%	18%

b) What is your opinion about the usefulness of the course to their teaching?

Very useful	Useful
27%	73%

What especially criticize?

- Everything was very constructive and useful as well
- Very interesting workshops, with very professional people
- Nothing
- On the first day, there was a delay in the flow of experiments, since they became both online and in person.
- I believe that holding the seminar online and in person at the same time did not help.
- The sound wasn't very good at times, but the organizers made a great effort to improve it.
- None
- The distance learning
- Problems with the sound the first day

What you would value more?

- The workshops
- I really liked the experiments with simple objects, which are also useful for students. Everything was very constructive and useful as well
- Before each experiment more theoretical analysis for those who do not have the knowledge of the subject.
- I really liked everything.
- The variety of experiments
- The sincere interest in making sure all points were understood by all participants. Furthermore, there was a variety of topics and they were all interesting.

Other Observations

- It would be useful to have a second part of the seminar in the future with more information, so that there could be an analysis of some of the issues mentioned.
- I liked the information about the project on the 20th of March and I am interested in more projects like this.
