## NASE course in Libya 2025

In the closing session of the course, the participants give they opinions about the courses had just finished. Here, we present some of them

- Thank you for the great session. It was simple yet resourceful.
- I like very much the course because we can try different simple activities.
- The experiments are very simple but the students can easily understand the astronomical phenomena.
- I think that we have to try the experiments before to show them to our students so we can be sure we'll make successful experiments.
- I cannot wait to show other teachers what I have learned.
