

Conclusions

NASE, Yamoussoukro, Ivory Coast, 2025

We would like to thank to the NASE International for a very useful training of Astronomy. It was an eye opener for many of the participants.

We very much appreciate your continuous support in bringing this subject to people in our country.

I have asked the participants to fill in the feedback form and hope we can improve our arrangements for future courses.

As an example, we include the comments of some participants:

- I am highly thankful to you ALL for your good presentation on Astronomy for schools
- Excellent session about four seasons of the year remarkable point.
- The topics are ALL clearly understood.
- I am going to demonstrate ALL these to my school students as well as my lovely family.
