Saint Mary's Cathedral

Built in the 1930s

Is it oriented according to the Council of Trent, with the nave running east-west?

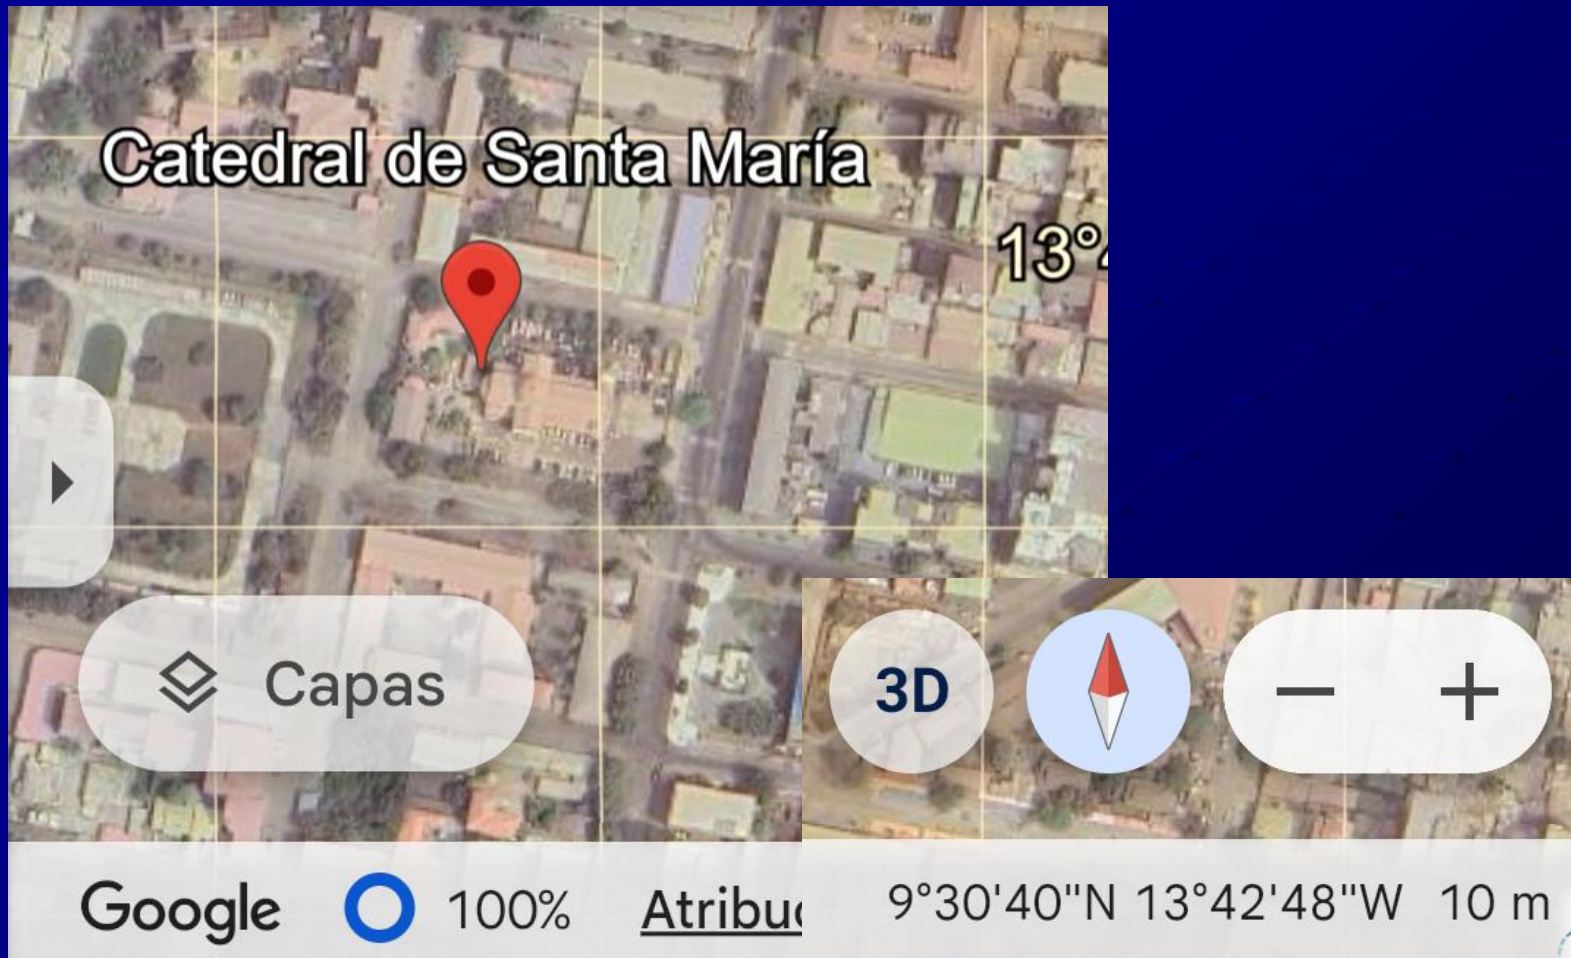

Let's check the orientation of the Cathedral using Google Earth; let's see if the nave is oriented East-West or not.

And let's see if the facade is North-South???

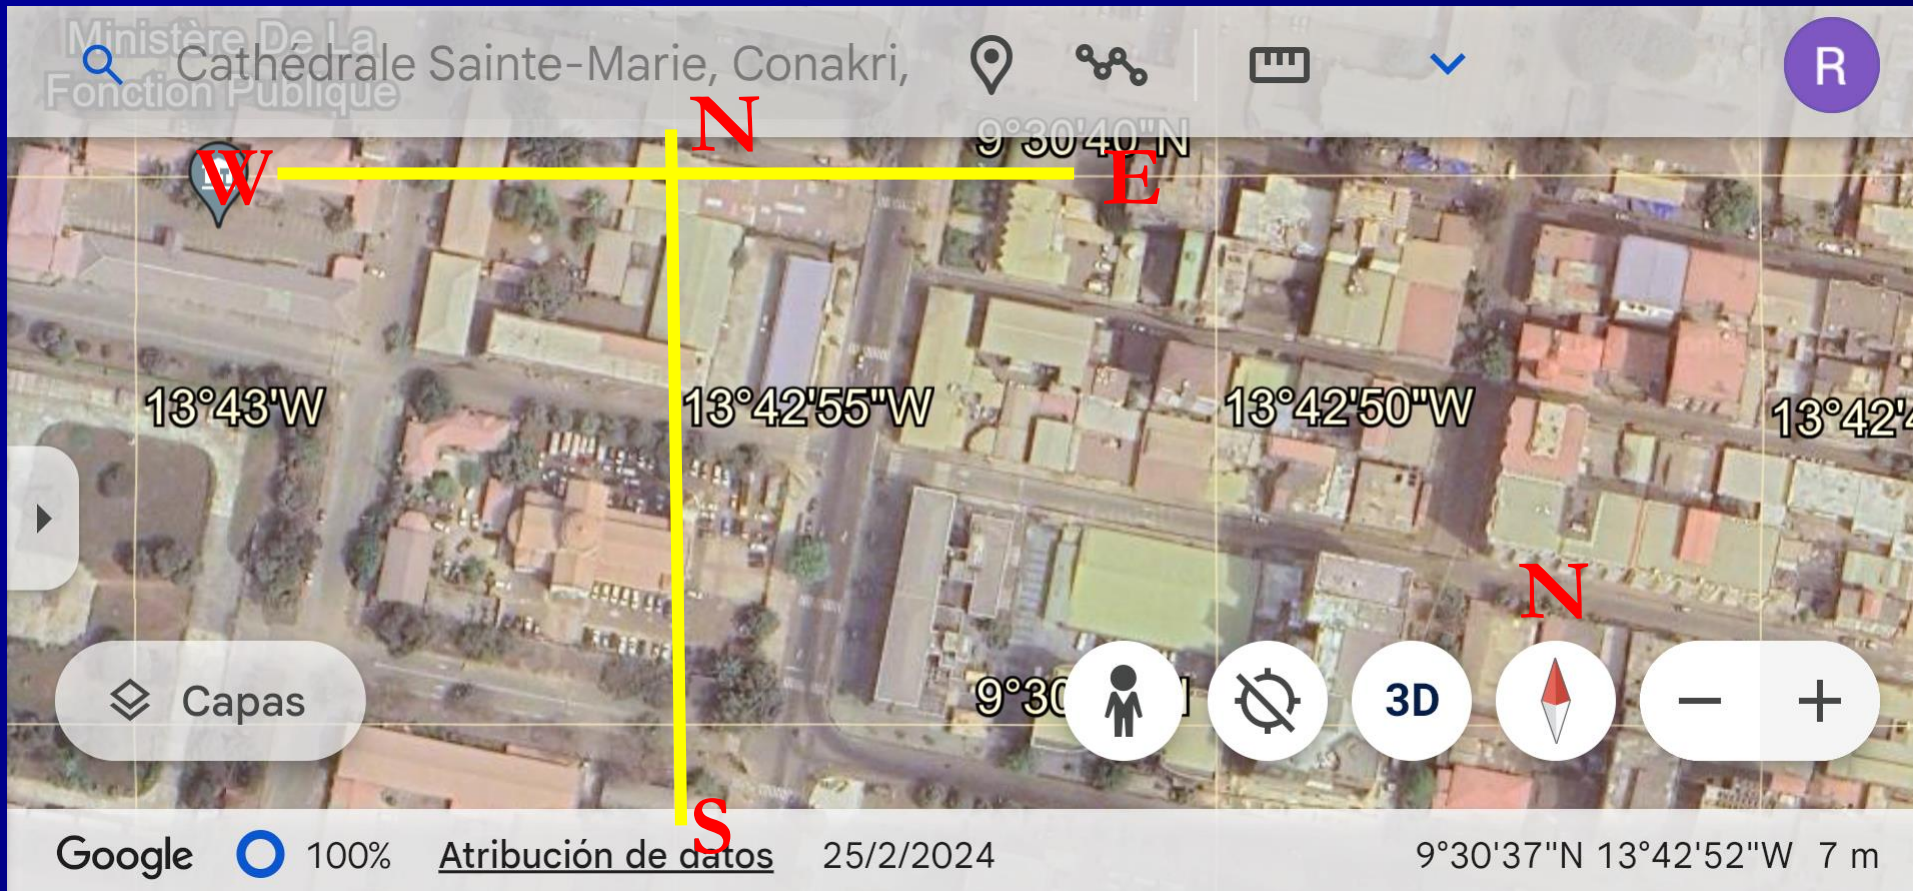

Google Earth with grid vertical meridians and horizontal parallels

The cathedral is slightly crooked in relation to the grid of meridians and parallels.

**Current orientation of the cathedral:
It has the main entrance facing east!**

The cathedral is upside down!!!

Thank you very much
for your attention!
